# *MORGES : AS A COMMON THREAD, THE CULTURAL ROUTE THROUGH THE OLD TOWN.*

You will penetrate in some houses to discover certain hidden treasures. At the corner of the street or in front of a building, we will give you a sight of the history and architecture and, who knows ? we might also tell some anecdotes.

Without forgetting to present Morges today. This tour is the general visit based on the Cultural Course of Morges, which indexes 23 interesting sites on the historical and architectural point of view.

## *MORGES: DISCOVER THE TRACES FROM THE PAST*

Here more than 700 years, Louis-de-Savoie founded the "good city" of Morges. What remains of this medieval city? While taking time to observe, we will discover the signs, the vestiges which we will make speak. Look on architecture: from an interior court to a spiral staircase, while passing by the Town hall, we will become aware of the evolution of the city from the Middle Ages to the traditional age while passing by the Renaissance.

## *MORGES: MANY GREAT MEN FOR A SMALL CITY !*

Scientists, musicians, painters, men of theatre, doctors and other sculptors, without forgetting the statesmen: many, whose fame exceeded the narrow communal limits, are from Morges. Monuments, street names, mural plates remain the discrete witnesses of "our" celebrities. While strolling in the park, by the lake and in the old town, we will bring back to life some of these famous people from Morges.

## *MORGES: A LONG ROMANCE WITH THE LAKE GENEVA*

Did you know that the part of Morges that has  
been inhabited the longest is now  
underwater?

For once, we will walk along the lake, not only  
admiring the flowers, but bringing up the rich  
and countless bonds between our city and  
Lake Geneva: military strategy, trade, birth of  
modern navigation, tourism, sports, without  
forgetting science, since limnology was born  
here. And why not speak about the galley  
slaves or fishing?

## *MORGES AND ITS CHURCHES*

More modest than the large cathedrals, the places of worship in Morges have small treasures to offer those who stop by. We will joyfully discover them with you! Architecture, stained-glass windows, witnesses of history and undoubtedly some anecdotes will accompany our quiet pilgrimage. The temple is one of the rare examples of protestant baroque architecture. The harmony of its facade creates "the most complete and spectacular ensemble of Western Switzerland".

## *MORGES SEEN FROM THE TOP*

From the shores of the lake, we will cross the city to discover the vale of the Morges river, then the vineyards. A great occasion to observe the beauty of the town's natural site and its modern growth onto the hillside. At the Signal d'Echichens, a magnificent panoramic view on the city and its surroundings is to be admired. If you're lucky, you will get a glimpse of the Mont Blanc to enhance this otherworldly picture.

(Reserved to visitors who wish to walk a little and whom an hour of walk on a good slope does not scare).

## *MORGES AND THE MORGES RIVER*

This tour starts at the entrance of the Independence Park near the castle and progressively climbs the course of the Morges river from its mouth to the skating rink, where it ends. This is an opportunity to revive certain activities or events of a historical, cultural, artisanal, geological or anecdotal nature that have marked this stretch of the river. This waterway (and not the historical chronology) serves as the central theme for the walk. The journey in time is nonetheless guaranteed

## *MORGES AND ITS TULIP FESTIVAL*

Every spring, Morges celebrates the Tulip Festival. You will be able to discover the dazzling flowering of 120'000 tulips, which will compete of elegance and illuminate the superb independance Park located on the shores of Lake Geneva, behind the castle of Morges. On an area of 30'000 square meters, you will discover more than 350 varieties of tulips planted in many flowerbeds and you will walk in an exceptional site facing the Alps.

This topic is only available during the  
Tulip Festival.
