PRESS RELEASE

Lifts : 32 additional days !

Nendaz propose, this summer, an extended operational period of the lift system from the beginning of June to the end of October.

In Nendaz, the Municipality, the Tourist Office and the ski lift company have been working hand in hand for many years on developing the destination's tourism. Continuous enhancement of the range of services offered both in summer and autumn is one of the main strategic axes shared by these three entities. With this in mind, they have decided to extend the opening of the ski lifts this summer, which also meets a strong demand from both holidaymakers and the region's inhabitants.

In specific terms, the Combatseline chairlift will operate on the weekends of 5th-6th of June and 12th-13th of June, and then will run continuously from 19th of June, compared to last year's opening on 27th of June. The Tracouet gondola will also be accessible to visitors from 19th of June and will run continuously until 31st of October, compared to being closed on 18th of October in 2020.

The additional 32 operational days ensure that our guests have at least one lift open from the beginning of June to the end of October. This gives them the opportunity to enjoy the cool mountain air, to recharge their batteries while enjoying breathtaking panoramic views and to go on an adventure on foot or by mountain bike to explore the picture postcard alpine scenery. The Municipality of Nendaz has undertaken to support this initiative by offering a deficit guarantee for this additional service via its Economy, Tourism and Mobility Committee's budget, which is funded by the tourist tax.

Nendaz Tourism, the Municipality of Nendaz and NV Remontées mécaniques SA would like to take this opportunity to thank all the local partners who have worked hard and tirelessly this winter to ensure the best possible welcome for our guests, as well as our valued customers for their loyalty and attachment to Nendaz.
