PRESSE RELEASE

Snow Vibes Festival : Morten and Lost Frequencies in Nendaz

To celebrate the end of the season, the ski domain in Nendaz welcomes, on the 8th of April 2023, one of the largest concerts in the Alps with various international performers.

A dance floor of over 1000 m² awaits thousands of spectators for the Nendaz Snow Vibes Festival at Tracouet, at 2'200 metres above sea level, with top-of-the-bill acts Morten and Lost Frequencies.

The Line-up

Lost Frequencies

Felix De Laet, better known by the name of Lost Frequencies, is a 29-year-old Belgian DJ and producer who has made a major name for himself on the international electro scene and is currently ranked 28th in the Mag Top 100 DJs. He is one of the few artists in the world to have reached one billion streams. He became known in 2014 with his first single "Are You With Me". The hits followed with tracks such as "Reality" and "Where Are You Now" which reached over 800,000,000 listens on Spotify. After performances around the world (New York, Chicago, Paris, Berlin, London, etc.), Lost Frequencies will be in Nendaz for a spectacular show.

Morten

Morten first gained notoriety in his native Denmark before gradually finding his way to an international audience. In 2020, Morten began a series of highly successful partnerships with French DJ David Guetta; with a debut hit 'Never Be Alone', the 'New Rave' EP and recently four new tracks and the launch of a 'Future Rave' label. Last year he entered the Top 100 DJs Mag at number 39, so 2022 is undoubtedly the year of achievement for the Dane.

Practical information

- Festival opening times : from 10h to 17h30 ; après-ski until 21h, at the bottom of the slopes, at The Gallery
- The festival site is reachable on foot or on skis from the top of the Tracouet gondola above Haute-Nendaz
